

Empower Your Workforce. Accelerate Your Growth.

DAIC delivers customised, industry-aligned corporate training programmes that transform professionals into high-performance leaders — built for India's evolving business landscape.

For Organizations & Teams

Corporate Training Solutions

Organisations across the world are transforming their workforce to drive innovation, productivity, and growth. Upskilling and reskilling are key to achieving this transformation.

IIPD Global delivers corporate training solutions through a structured, assessment-led model. Our approach ensures that every engagement is aligned with role requirements, competency standards, and measurable business outcomes.

Corporate Training Solutions (What We Offer)

Discover courses across different domains

CORE

PLC Programming & Commissioning

Master Programmable Logic Controllers from ladder logic basics to advanced structured programming and commissioning on live panels.

- Siemens S7-300/400/1200/1500 & Allen Bradley
- Ladder diagram, FBD, STL programming
- I/O configuration & field device wiring
- Fault diagnosis & troubleshooting

Duration: 3-5 Days **On-site / Noida Lab**

VISUALISATION

SCADA & HMI Training

Build and operate real-time monitoring and control systems using industry-standard SCADA platforms and HMI panels.

- WinCC, iFIX, Ignition SCADA platforms
- HMI screen design & tag configuration
- Alarm management & trending
- OPC/Modbus communication protocols

Duration: 3-4 Days

Hybrid

MOTION

Drives & Motors Training

Understand, configure, and maintain AC/DC variable frequency drives and motor control systems used across industrial applications.

- VFD selection, installation & parameter setting
- Siemens, ABB, Schneider drive commissioning
- Motor control circuits & soft starters
- Energy efficiency & drive diagnostics

Duration: 2-3 Days

On-site / Lab

ADVANCED

Robotics Training

Hands-on training on industrial robots covering programming, integration, and safe operation for manufacturing and assembly lines.

- FANUC, ABB, Kuka robot programming
- Pick & place, welding, palletising applications
- Robot-PLC integration & I/O mapping
- Safety protocols & maintenance routines

INSTRUMENTATION

Process Instrumentation

Learn calibration, installation, and maintenance of field instruments used in process industries for accurate measurement and control.

- Transmitters: pressure, temperature, flow, level
- 4-20 mA loops & HART communication
- Control valve sizing & positioner setup
- Process loop tuning (PID)

Duration: 3-4 Days

On-site / Hybrid

DESIGN

Panel Designing & AutoCAD Electrical

Design industrial control panels from schematic to physical layout using AutoCAD Electrical, following IS/IEC standards.

- Single-line & schematic drawing creation
- Component selection & BOM generation
- Panel layout, busbar & cable sizing
- IS/IEC 60204 safety standards

MOTION CONTROL

Servo Motor & Motion Systems

Configure and commission servo drives and motion control systems for high-precision manufacturing automation tasks.

- Servo drive commissioning & auto-tuning
- Position, velocity & torque control modes
- EtherCAT & Profinet motion networks
- CNC & multi-axis interpolation basics

Duration: 3-4 Days

Lab-based

PROCESS CONTROL

DCS Training

Operate and engineer Distributed Control Systems used in continuous process industries like oil & gas, chemicals, and power.

- Honeywell Experion, Yokogawa Centum, ABB 800xA
- Function block configuration & loop tuning
- Batch sequencing & control strategies
- DCS maintenance & alarm rationalisation

Duration: 4-5 Days

Hybrid / Lab

NETWORKING

PLC Networking & Industrial Protocols

Connect factory-floor devices using industrial communication networks and integrate them into plant-wide automation architectures.

- Profibus, Profinet, DeviceNet, EtherNet/IP
- Modbus RTU/TCP configuration
- Network topology, switches & media
- OPC-UA & IIoT gateway integration

Duration: 2-3 Days

On-site / Online

WHY CHOOSE DIAC

Built for the Industrial Automation Engineer

Since 2008, DIAC has closed the skills gap between industry demand and engineering talent across India's manufacturing sector.

Industry-Relevant Curriculum

Courses co-developed with automation engineers and constantly updated with the latest PLC, SCADA, and robotics technologies.

Modern Labs & Live Equipment

Hands-on training on real PLCs, HMIs, servo drives, and industrial robots — not simulations alone.

Expert Faculty

Subject matter experts and seasoned industry leaders with real-world automation project experience mentor every batch.

Measurable ROI

Pre & post assessments, skill certifications, and performance benchmarks so you can track every rupee of training spend.

DIAC-Certified Credentials

Recognised certificates awarded on completion — valued by 4000+ hiring partners across India's manufacturing industry.

Flexible Delivery

On-site at your plant, at our Noida facility, or hybrid — scheduled to minimise disruption to your production shifts.

Why IIPD?

Customized Curriculum

Programs tailored to organizational goals, job-role competencies, and industry requirements.

Competency Mapping

Mapping competencies against role expectations to define benchmarks and development priorities.

Skill Gap Analysis

Structured assessments to identify skill gaps and build targeted learning pathways.

OUR APPROACH

How Your Corporate Training is Delivered

A structured five-step process ensures every programme is aligned to your plant's specific needs and produces real skill uplift.

1

Needs Assessment

We audit your team's current skills, your equipment, and your production challenges.

2

Custom Curriculum

Training content is mapped to your exact machinery brands and operating environment.

3

Expert Delivery

Seasoned automation professionals run intensive, hands-on sessions at your site or our lab.

4

Skill Assessment

Practical tests and knowledge checks confirm competency before certification is issued.

5

ROI Report

A detailed impact report with pre/post benchmarks is shared with your management team.

CLIENT VOICES

What Our Corporate Clients Say

Trusted by manufacturing companies across India to upskill their automation engineers.

"DIAC's PLC and SCADA training transformed how our maintenance team handles downtime. Fault diagnosis time dropped by over 40% within three months of the programme."

Rajan Verma

Plant Head, Automotive Components Mfg.

"We sent 18 engineers for Drives & Servo training at DIAC's Noida facility. The hands-on approach on real hardware made all the difference — concepts stuck immediately."

Anita Singh

Training Manager, Packaging Industry

"Our DCS-trained operators from DIAC's programme now handle process upsets confidently. The curriculum was customised perfectly to our Honeywell Experion system."

Pradeep Mehta

Operations Director, Chemical Process Plant
